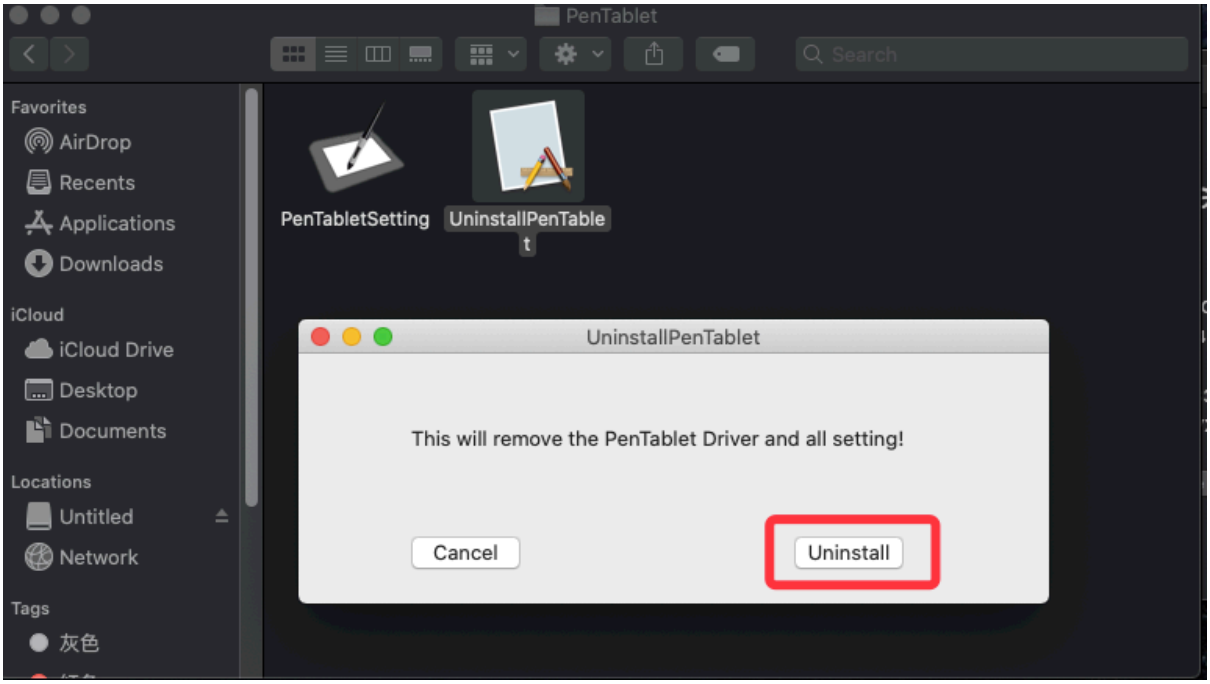
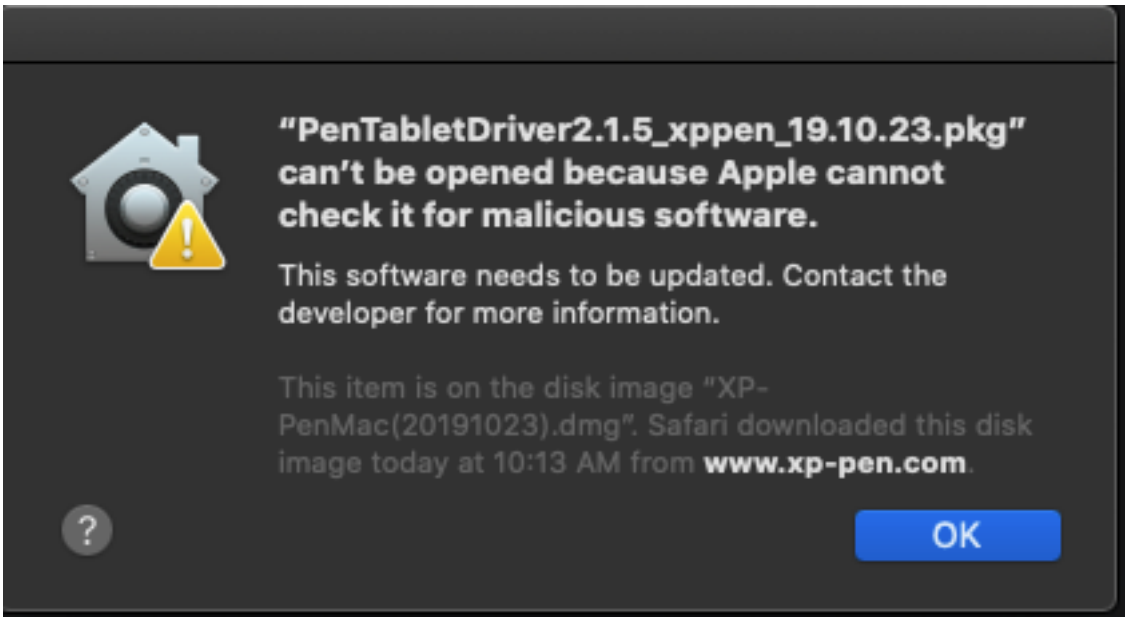
How to installed XP-Pen driver in Catalina (10.15)?

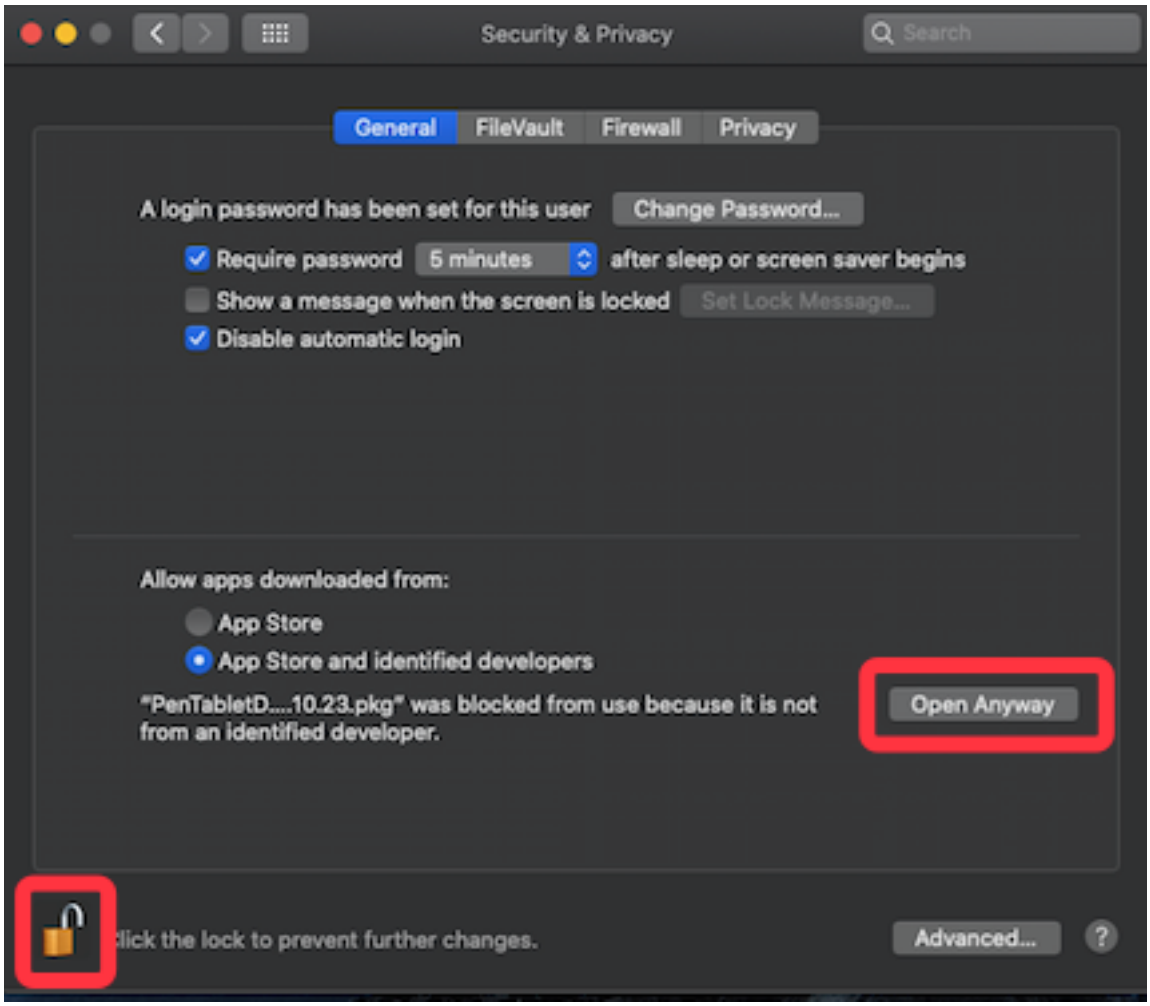
1. Go to the Application Folder and make sure uninstall all of PenTablet drivers in the PenTablet Folder.



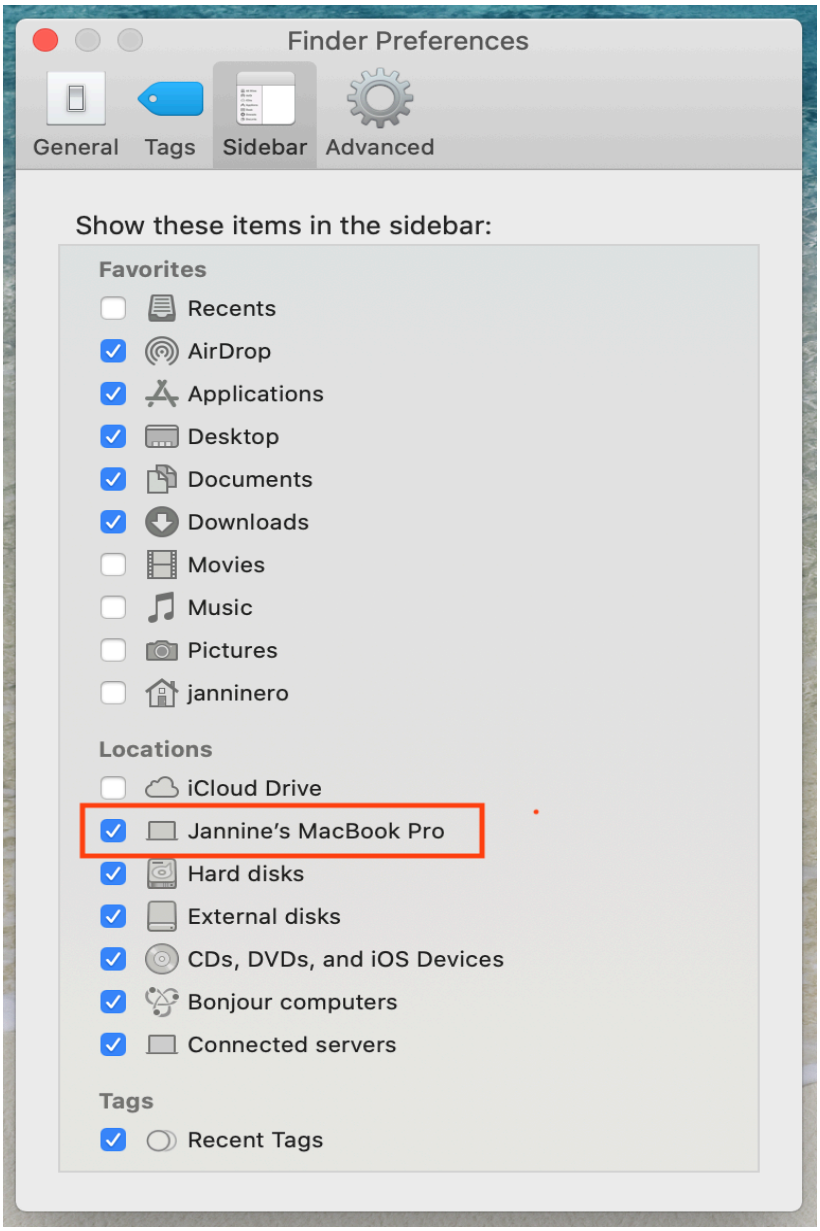
2. Go to ***"System Preferences – Security & Privacy"***
3. On the Privacy tab, please delete all of tablet files on ***"Accessibility"*** & ***"Input Monitoring"***.
4. Reboot your Mac.
5. When the computer Restarts, please go to the XP-Pen official website then download and install the newest Mac driver.
6. Install the newest driver and if you get ***"PenTabletDriver can't be opened because Apple cannot check it for malicious software."*** Continue to step 7.



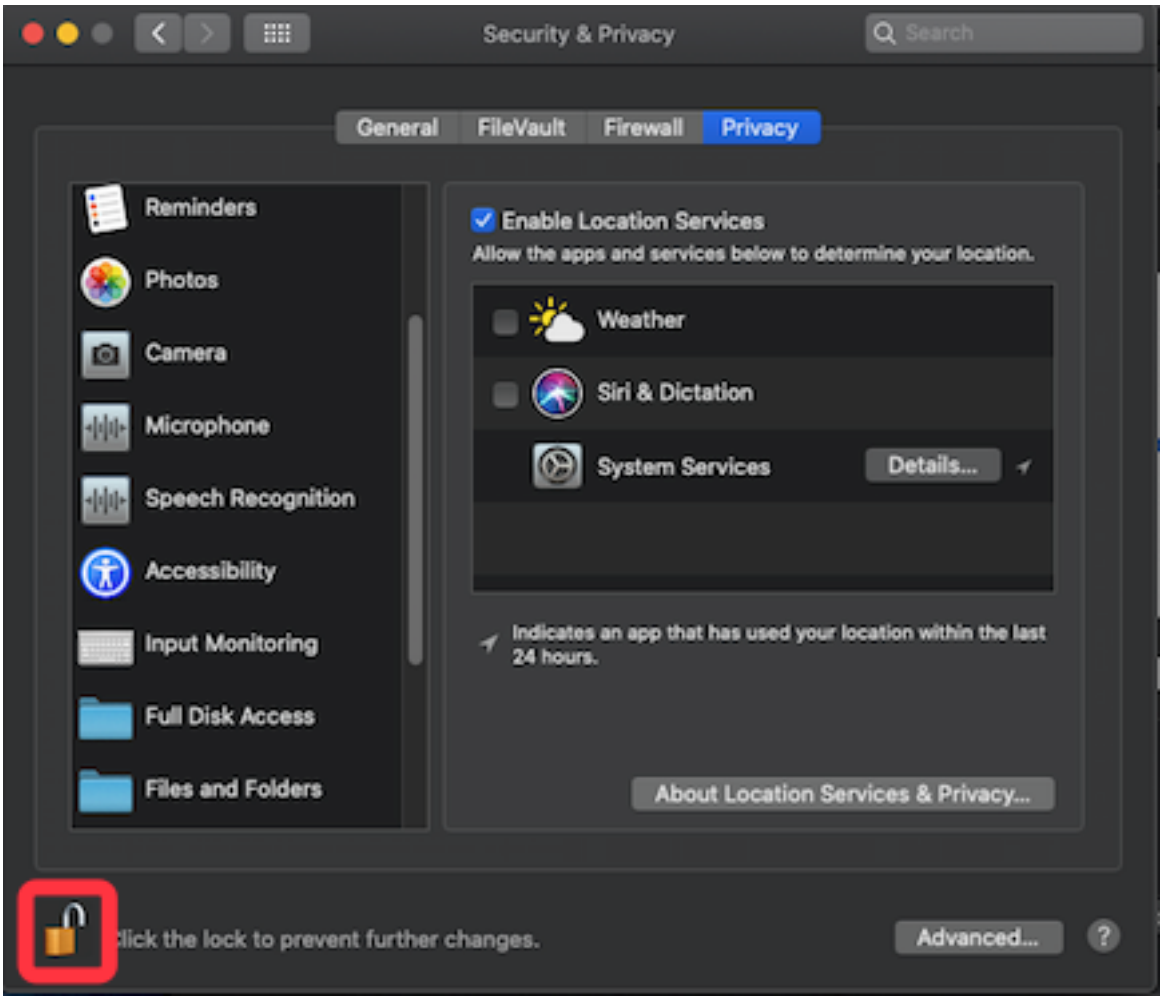
7. Go to ***"System Preferences – Security & Privacy".***
8. On the General Tab, please Unlock ***"Click the lock to make changes"*** then click ***"Open Anyway"*** button to install driver until complete.



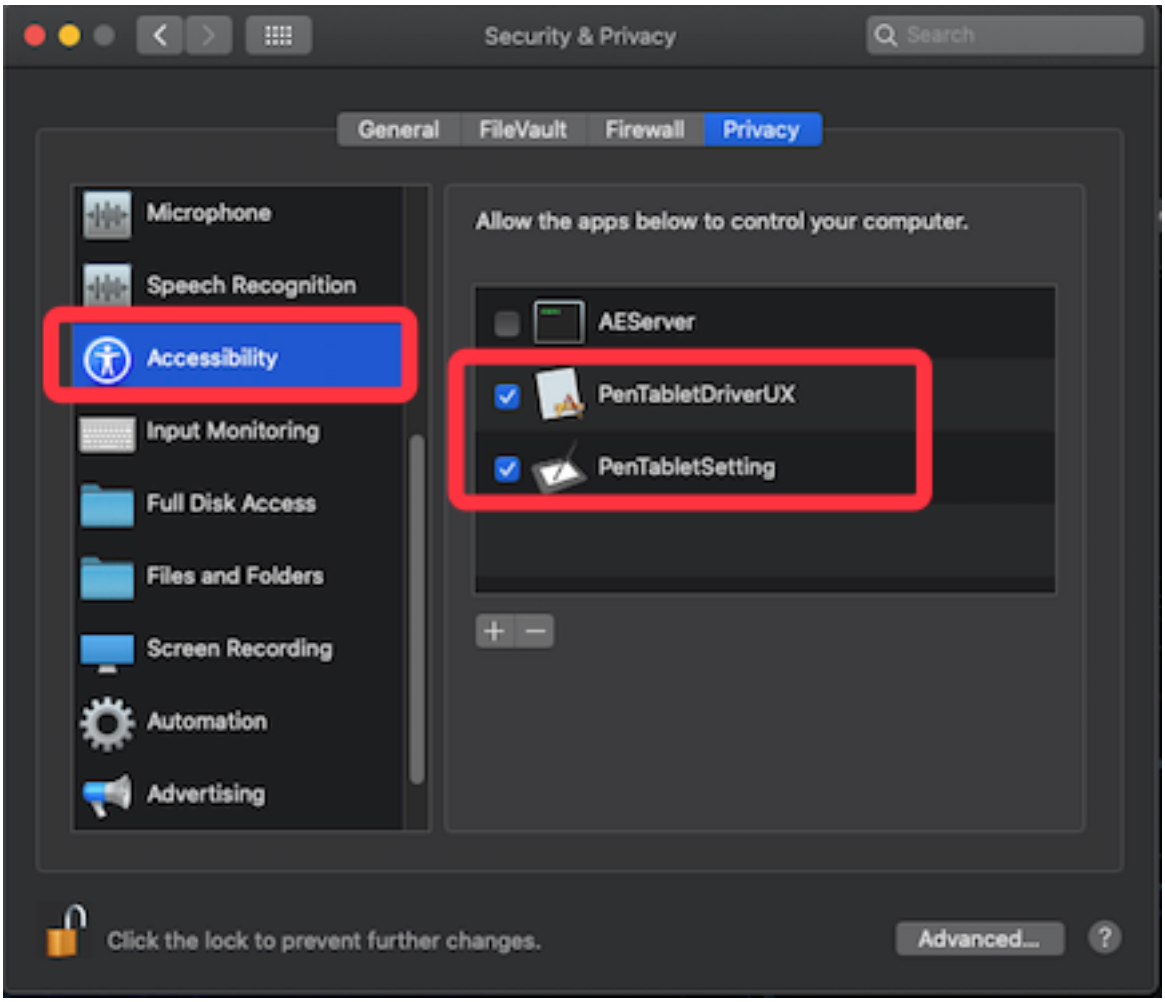
9. Once the Install is complete please go to ***"Finder" (The word in the top left corner of your screen) – "Preferences" – "Sidebar".***
10. On the ***"Sidebar"*** tab, please make sure the box next to your computers name is checked like in the image below.



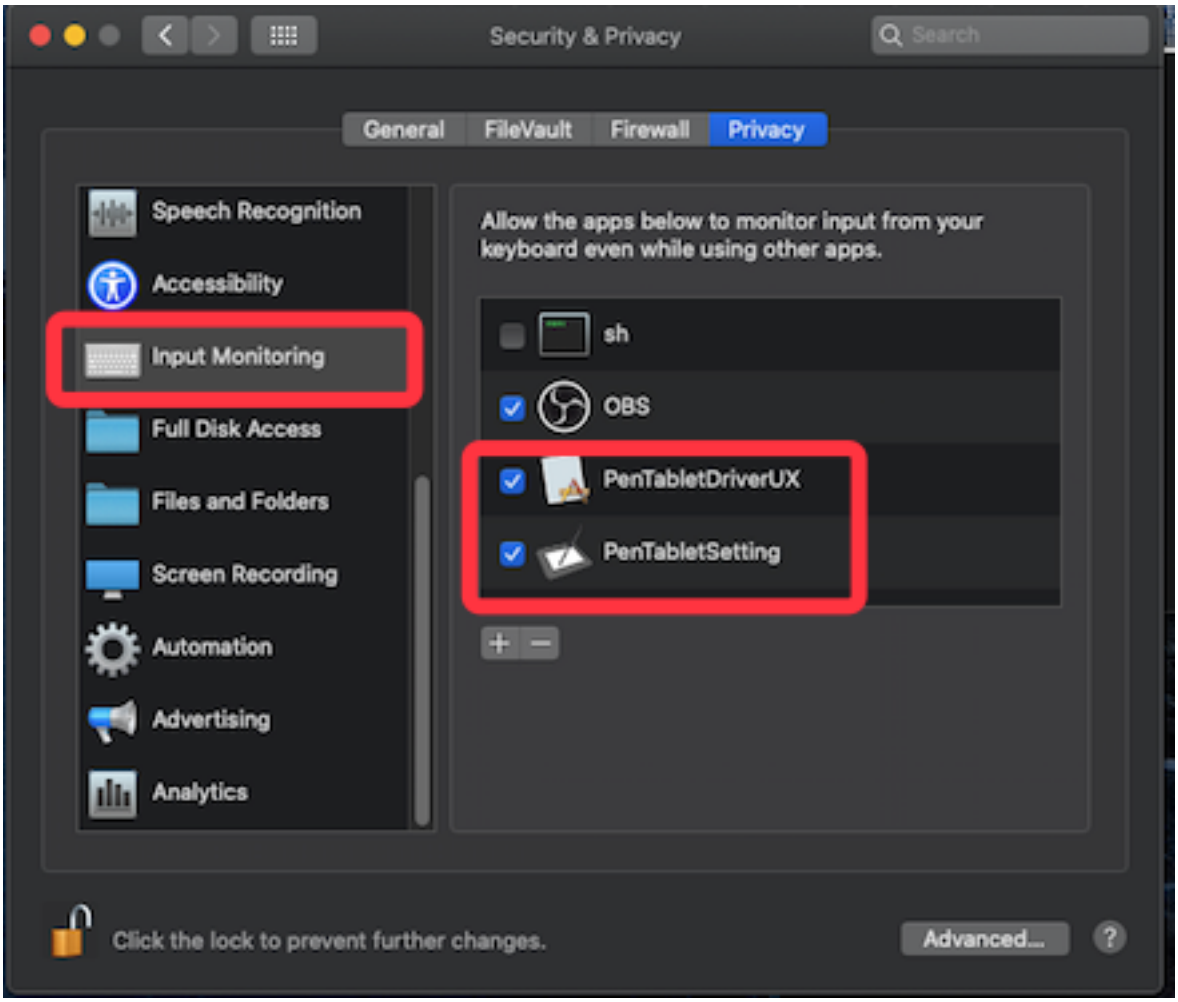
11. Go to ***"System Preferences - Security & Privacy - Privacy – Accessibility".*** Unlock "Click the lock to make changes."



12. On the ***Accessibility tab***, please enable ***"PenTabletSetting".***
13. Click "+" button then go to ***"Macintosh HD – Library – Application Support – Pen Tablet"*** folder then choice ***"PenTabletDriverUX"*** and click OK button.



14. Go to ***Input Monitor tab*** and please also enable ***"PenTabletSetting".***
15. Click "+" button then go to ***"Macintosh HD – Library – Application Support – Pen Tablet" folder then choice "PenTabletDriverUX" and click OK button. (If you get error message, please click "Quit Now" button.)***



16. Reboot Mac and when the computer restarts, please open the PenTablet setting then check for pen pressure on the tablet?
